To Whom It May Concern,

Please extend the rate relief credit for residential CEA customers on the "Clean Impact" plan. With the electrical rates already at high levels impacting all residential customers, our most vulnerable residents (seniors, for example) are unable to keep up.

As President of OMHA (Oceanside Manufactured Homwowners Alliance,Inc.) our organization, with representation throughout the Manufactured Home Parks, see first hand the struggles residents are facing.

It is a sad day when folks have to make decisions regarding paying their utility bill or buy food for their family.

The current electrical rates are becoming an increasingly significant affordability problem for all of us.

Respectfully,

Penelope Russell
