

ADOPTED RATES EFFECTIVE FEBRUARY 1, 2026

The rates below reflect Clean Energy Alliance’s (CEA) generation rate, and do not include San Diego Gas & Electric (SDG&E) delivery charge, General Municipal Surcharge (GMS), or the Power Charge Indifference Adjustment (Exit Fees) on SDG&E’s CCA-CRS rate tariff. Information for these charges can be found at www.sdge.com.

<p>*The installed systems are optimized to meet customer needs, with a blended rate ranging from \$0.25 to \$0.50 per kilowatt-hour depending on system configuration.</p> <p>Baseline Project: 500 kW-dc roof-mounted Photovoltaic Solar System (PV) paired with a 1,000 kWh Battery Energy Storage System (BESS). Typical 1–2-story commercial building. Interconnected behind the customer utility meter on the same parcel. Point of Interconnection (POI) is in the electrical room or at an external service panel. Solar and storage systems are <200 ft from the POI. Expected PV yield is 1,650 kWh/kW-dc. Tier-1 equipment. \$3.61/W-dc blended solar plus storage build cost.</p> <p>Variables: The following factors can change system cost and performance relative to the base case, which in turn affects the offered rate: rooftop vs carport; roof condition and usable area; installation complexity; shading and solar irradiance; trenching and cable routing distances; distance to POI; utility service upgrades and switchgear capacity; battery size and indoor vs outdoor placement; solar system size; fire suppression and code compliance; local codes, inspections, and prevailing wage; seismic, wind, or flood conditions and any hazardous materials; site access, staging space, work hours, and tenant coordination; equipment availability, tariffs, and material costs; site lease payments.</p>
